

Please allow XM to offer Instant Traffic & Weather. This is a service that I am willing to pay for as part of my monthly XM fee. They should not be blocked from offering these and other services that compete with public free radio. XM provides better variety and quality than free public radio. I get public radio for free, but am not satisfied with it, so I pay extra to listen to XM. Their efforts to provide a paid alternative to free public radio should not be blocked. the National Asociation of Broadcasters should not be the ones to decide what services XM can offer. I'm paying the bill, and it's my choice. I strongly urge the FCC to reject the NAB petition 04-160. Let me decide what service I am willing to pay for.
Thank you.

Dan Riley.
